WHO DOESN'T LOVE TOOLS?

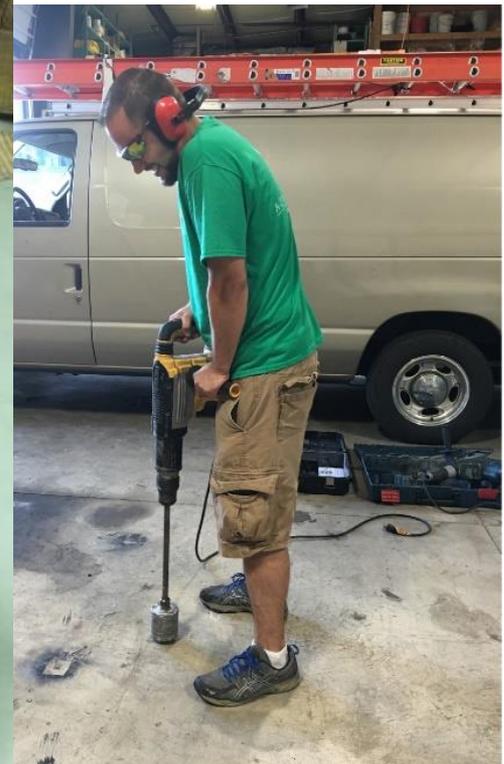

- We have lots of them! These are just the tools that are not in the trucks everyday!

- DISCLAIMER -

- Some brands are better than others – and we are going to point them out.
- You are welcome to disagree, but it doesn't mean you are right.

10. ROTARY HAMMER AND BITS

- We suggest 1 ¾" SDS Max and above.
- Dewalt wins here for 1 reason – ERGONOMICS.

9. CRM - SOFTWARE

- Customer Relationship Management Software.
- Streamline your paperwork.
- Excel and Outlook are not CRMS.
- There are lots of great choices out there.
- We use UDA Construction Suite.

PROCORE

8. GOOD HOLE SAWS

Bi Metal Hole Saws

- Don't waste your money on these.
- NOT Professional Grade.

Carbide Tipped

- Cost slightly more.
- Last 10 - 20 X longer.
- Cuts Vinyl, Aluminum, EIFS, Stucco, metal, wood and even nails.

7. CREDIT CARD READER

- Get paid while you are on site.
- All of our techs can take payment in the field.
- Rates as low as 1.5%.
- We have used both Square and Intuit.
- Intuit integrates better with Quick Books.

6. CORDLESS SDS PLUS DRILL

For Drilling in Concrete & Masonry

- 12V Milwaukee.
 - Ideal for installing mechanical fasteners in crawlspaces.
 - Lightweight.

- 18V Milwaukee.
 - Ideal for up to 1" holes.
 - Plenty of Power.

5. WORK VEHICLES.

- We have tried them all.
 - Pickup Trucks.
 - Box Trucks.
 - Trailers.
 - Work Vans.
- Work vans are the best choice for residential systems.
 - Great organization.
 - Room for everything you need.
 - Easy getting in and out.
 - Fits 10' pipe inside.

5. WORK VEHICLES CONTINUED

- Trailers are great mobile warehouses for larger commercial projects.
 - Fill for a full weeks worth of work.
 - Pull to site with van.
 - Park on site.
 - Restock vans daily.
 - No need to pull it around all week.

4. THE PLUMB BOB

- Mark centerlines of ceilings and roofs.
- It was good enough to build the pyramids.
- Never needs sharpened or batteries replaced.
- Perfect every time.
- Last forever.

3. DIGITAL MICRO MANOMETERS

- Digital micro manometers measure pressure field extension so you can correctly size a system.
- We have no idea how you can charge people for your services without one of these.
- They are required for design, troubleshooting, and repair.
- Please do not try to tell me “smoke” is just as good. **It isn't.** It is useful for finding leaks in your pressure field.

We use these 3 digit ones for residential

We use these 4 digit ones for commercial

2. PIPE CUTTER

- Rigid 154-P Pipe cutter.
- Cuts up to 4" SCH40 PVC pipe.
- No - It doesn't cut SCH20 or any of the other inferior pipe types. Why would you use those anyway in a RN system?
- Faster and safer than a reciprocating saw with no mess to clean up.

2. PIPE CUTTER - CONTINUED

1. SCRATCH AWL

- The tool with 1,001 uses.
 - Removing hole saw plugs.
 - Marking drywall ceilings.
 - Penetrating drywall ceiling gently.
 - Digging extraction pits.
 - Creating center points in metal.
 - The uses are endless. You will find a new use for it everyday!
 - More uses than Duct Tape!

THANK YOU
