 - Radon Measurement Field Technician*
 - Radon Mitigation Specialist*
 - Radon Mitigation Installer*
-
- Soil Gas Mitigation Compliance Inspector

*ANAB accredited to ISO/IEC 17024

What is Accreditation?

ANSI National Accreditation Board

Accreditation is an independent, third-party evaluation of a conformity assessment body (certifying body) against recognized standards

- an indication that NRPP is competent to carry out its certification activities and provides a global benchmark for quality certification

Accreditation process

Establishes trust: NRPP's credentials are valid and reliable indicators of professional competence

Logo Usage Policy Updates

Compliance Policy Updates

Complaints Against Certified Professionals

- Heard by 3-member disciplinary panel
- Clearly defined Classes of Violations: A, B, C & D

Draft Task Inventory

Validation Survey

Final JTA

Certification
Requirements

SMEs = Subject Matter Experts

NRPP certification programs are NOT developed by NRPP staff

We engage representative, balanced committees

- *Representative* = represents the certification's stakeholder groups
- *Balanced* = no single interest predominating
