NRPP Updates

2026 Activities

- Approved new measurement and mitigation certification programs
- Continued development of new commercial credentials
- Continued development of a new vapor intrusion credential
- Revised the criteria for approval of initial (entry-level) training courses
- Updated continuing education model
- Updated lab certification criteria

New measurement & mitigation certifications

- Regular revalidation to ensure we are assessing candidates against what is required for proficiency in radon measurement and mitigation

- Committess of SMEs conducted an in depth review of certification: exam content, exam method, requirements for initial certification, requirements for recertification, recertification interval

Radon Mitigation Specialist

Changes to initial certification requirements

	Current RMS	**New RMS**
Initial training course(s)	16 hr. measurement 24 hr. mitigation	32 hr. mitigation
Exam	Part 1 RMI: 85 items + 10 pilot Part 2 RMS: 65 items + 5 pilot Total: 165 (150 scored + 15 pilot)	Total: 175 items (160 scored + 15 pilot)
Field Practicum	---	Yes
Code of Ethics	Yes	Yes
QA/QM attestation	Yes	Yes

Radon Mitigation Specialist

Changes to recertification requirements

	Current RMS	New RMS
Interval	Every 2 years	Every 2 years
4-hour Mandatory standards overview course	Yes	Yes
Continuing education hours	8	20
Code of Ethics	No	Yes
QA/QM attestation	No	Yes

Radon Measurement Professional

Changes to initial certification requirements

	Current RMP	**New RMP**
Initial training course	16 hr. measurement	16 hr. measurement
Exam	Part 1 RMFT: 85 items + 10 pilot Part 2 RMP: 65 items + 5 pilot Total: 165 (150 scored + 15 pilot)	Total: 105 items (94 scored + 11 pilot)
Code of Ethics	Yes	Yes
QA/QM attestation	Yes	Yes
Device registration (for initial certification and when adding a new device to your certification account)	DPT Proof of Calibration or Proof of purchase	DST DPT Proof of Calibration Proof of purchase

Radon Measurement Professional

Changes to recertification requirements

	Current RMP	**New RMP**
Interval	Every 2 years	Every 2 years
4-hour Mandatory standards overview course	Yes	Yes
Continuing education hours (total)	8	8
Code of Ethics	No	Yes
QA/QM attestation	No	Yes
Device registration	DPT or DST Proof of calibration	Proof of calibration

New Credentials

Vapor Intrusion Mitigation Professional (VIMP)

Commercial Radon Measurement Professional

Commercial Radon Mitigation Specialist

- Exam development
- Certification & recertification requirements

New Options for Continuing Education

2026 CE Options
Technical courses: NRPP-approved course; given NRPP course ID
Nontechnical courses: NRPP-approved course; given NRPP course ID
Third party technical courses
Professional events (presentations, articles, teaching) - same as current Cat 2. Each activity has different submission requirements & CE maximums
Mitigation Work Samples (RMS - max 8 CEs allowed)
Professional technical conferences: NRPP-approved; verification of attendance is required
Volunteer work: Standards Consortium, certification & exam development

Updated Lab Certification

Lab Certification Criteria Updates:

- Pathways: Accredited lab and non-accredited lab
- New criteria based on ISO 17025
- Recertification every year instead of every 2 years -- report changes at recertification

Next steps:

- Certification Council Approval
- Communicate & transition labs
